Nature Safe 10-0-8 will give turf managers season long control of localized dry spots. It will allow for management of hydrophobic soil conditions, while providing up to a pound of nitrogen per acre.

Ocean Organics Biocatalyst extracts are primarily beneficial to build roots and improve stress tolerance. Kelp extracts can significantly increase stress tolerance and provide survival potential by supplying growth hormones.

Two 1/2 pound applications of Nitrogen will give 100 plus days of water management in a wide range of soil conditions.
